

Move Your Mission Forward with ACF Solutions

Services Built for You

System Implementation

We implement and configure your new technology systems to meet your specific needs.

System Integration

We integrate your systems to eliminate re-keying and data silos.

Data Migration

We analyze, map, and accurately convert data from your existing system into your new systems.

Training

We help you understand your new systems so you can take advantage of your technology investment right away.

Operations Analysis

We align your systems and processes with your mission.

"The ACF team provided superb systems change skills, knowledge of nonprofit perspectives, and technical expertise as they led our team and improved our ability to support those we serve."

Mary Leary
Senior Director
Easter Seals Project ACTION

Whether your non-profit is large or small, you're focused on activities that advance your mission. That includes competing for constituents and funding, and always trying to do more with tight resources.

At ACF Solutions, we help non-profit professionals like you meet these challenges head-on. Through improved operations and targeted investments in new technology systems and processes, we can help your organization move your mission forward:

- **Strengthen constituent outreach**
- **Cultivate funding opportunities**
- **Build a strong and growing donor base**
- **Engage volunteers**
- **Manage your mission and programs**
- **Drive effective campaigns**

Implementation Services You Can Rely On

Why work with ACF Solutions? Our consultants have an unmatched blend of technology expertise, project management skills, and non-profit experience:

- **Deep non-profit experience.** We know how to work with non-profits — from traditional charities and political organizations to associations, colleges and universities. And, we add a healthy understanding of for-profit sector best practices.
- **Technical know-how.** We're savvy about leading software, including salesforce.com and Convio Common Ground™. And, we can extend and integrate your systems with custom development.
- **Measureable results.** Our consultants deliver the solid technical skills you need for a successful implementation. But at heart, we're business analysts. We focus less on tech-speak and more on how to further your mission with real results.
- **Worry-free project management.** Data conversion, system interfaces, and organization-wide change management — implementation gets complex, and these aspects of implementation can derail a project without careful oversight. But, we're on it: We keep a tight reign on your entire project to ensure you get the results you expect.

Visualforce, Apex code, custom portals, web services — with our help, you'll see no limit to how you can extend your salesforce.com and Common Ground systems.
